CAREER OBJECTIVE

Creative and visionary Computer Science student with a passion for building innovative solutions. Eager to leverage deep expertise in Artificial Intelligence, Machine Learning, and robust software development paradigms to solve complex real-world problems. Committed to driving technological advancement by integrating cutting-edge AI models into impactful, user-centric products.

EDUCATION

Chandubhai S. Patel College, Charusat University

Bachelor of Technology (B.Tech) in Computer Science

- CGPA: 8.15 (till Semester 5)

Changa, Gujarat

2024 – Present

Government Polytechnic Ahmedabad

Diploma in Computer Engineering

- CGPA: 9.04

Ahmedabad, Gujarat

2021 – 2024

TECHNICAL SKILLS

- **Programming Languages:** Java, C, C++, Python, PHP
- **AI/ML:** Machine Learning, Agentic AI, LLM, Basics of NLP
- **Frameworks & Libraries:** MERN Stack, Flutter, Django, Scikit-learn, TensorFlow, Keras, OpenCV, NumPy, Pandas
- **Core Concepts:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Object-Oriented Programming (OOP)
- **Soft Skills:** Creative thinking, Quick learner, Problem-solving

EXPERIENCE

Brainy Beams

Data Science and Machine Learning Intern

May 2025 – June 2025

- Focused on building and training machine learning models and analyzing complex datasets to extract actionable insights.

Infolabz

Machine Learning Intern

July 2023 – August 2023

- Developed foundational ML models and gained hands-on experience with data processing pipelines and real-world datasets.

Infolabz

Django Intern

August 2022 – September 2022

- Worked on backend development utilizing the Django framework to build scalable and efficient web applications.

PROJECTS

Evolvo: 2048 (Live on Google Play Store)

Flutter

- Developed and successfully launched an engaging 2048 puzzle game utilizing Flutter for a seamless cross-platform mobile experience.

PVF Studio Website

MERN Stack

- Designed and developed a comprehensive website using the MERN stack, specifically focused on addressing and solving real-world operational problems for the studio.

Stock Analyzer

MERN Stack, Angel One API

- Created a robust financial tool utilizing the MERN stack and integrating the Angel One API to fetch, process, and display live and historical market data for in-depth analysis.

IPL Score Prediction Model

Machine Learning

- Engineered a predictive model using Machine Learning algorithms to forecast Indian Premier League match scores based on historical data patterns.

Stock Price Prediction Model

Machine Learning

- Developed a Machine Learning application to predict future stock price movements by analyzing market trends and historical datasets.

CERTIFICATIONS

- **MERN Stack Professional Course** – Coursera
- **IBM DevOps, Cloud, and Agile Foundation Professional Course** – Coursera
- **NPTEL - Data Structure & Algorithms Using Java:** Silver + Elite Certification (77%)
- **NPTEL - Design & Analysis of Algorithms:** Course Completion Certificate
